

Bibash Gautam

Data Analyst | Front-End Developer | Java Developer

bibashgautam@gmail.com | +1-289-600-3517 | Niagara Falls, ON | linkedin.com/in/bibashgautam

PROFESSIONAL SUMMARY

Results-driven Data Analyst and Full-Stack Developer with 2+ years of professional experience building data pipelines, conducting statistical analysis, and developing high-performance web and mobile applications. Currently advancing expertise through a Master of Data Analytics at the University of Niagara Falls.

CORE COMPETENCIES

Programming & Frameworks: Python · JavaScript (ES6+) · Java · React · Node.js

Data Analysis & Statistics: Descriptive / Predictive / Prescriptive Analytics · Hypothesis Testing · Regression Analysis · EDA

BI & Visualization: Power BI · Tableau · Excel (Advanced)

Database & Querying: MySQL · Data Extraction · ETL Pipelines · Data Wrangling

Machine Learning: Random Forest · Gradient Boosting · Classification & Clustering (scikit-learn)

Languages: English (Fluent) · Hindi (Fluent) · Nepali (Native)

EDUCATION

University of Niagara Falls — *Master of Data Analytics* 2024 – Present (3rd Semester)

Tribhuvan University — *Bachelor of Computer Applications* 2017 – 2020

WORK EXPERIENCE

Armam Games Private Limited Jan 2022 – Apr 2022
Front-End Developer Maharajganj, Nepal

- Built responsive, design-focused web interfaces using JavaScript and React, improving session engagement
- Developed reusable component libraries that served as the foundation for future product features
- Implemented personalized UI features based on user behavior data, increasing feature adoption
- Enforced coding standards and QA processes to maintain production-grade code quality across the team
- Proactively integrated modern frontend tooling and best practices to stay aligned with industry trends

Foliage Soft Private Limited Jul 2020 – Apr 2021
Java and UI Developer Intern Baluwatar Road, Nepal

- Delivered pixel-perfect cross-platform UIs for web and Android, translating Figma mockups accurately
- Customized Android (AOSP) system components to meet client-specific hardware and UX requirements
- Identified and resolved memory leaks and performance bottlenecks, significantly reducing app crash rates
- Integrated RESTful APIs to power real-time, data-driven application features across platforms
- Collaborated cross-functionally in an Agile environment to deliver features consistently on schedule

PROJECTS

Credit Card Usage Behavior — Marketing Analytics Nov 2024
Academic Project · Master of Data Analytics, University of Niagara Falls

- Applied EDA and statistical analysis on consumer financial data to identify key drivers of credit card payment behavior
- Found income level and number of cards held to be the most significant predictors of payment preference
- Disproved that BNPL (Buy Now, Pay Later) services significantly substitute traditional credit card usage
- Proposed model enhancements using Random Forest and Gradient Boosting to improve predictive accuracy
- Presented findings with Tableau visualizations to a panel of faculty evaluators

KEYWORDS & AREAS OF EXPERTISE

Data Analytics · Statistical Modelling · Machine Learning · Data Visualization · Business Intelligence · SQL · Power BI · Tableau · ETL · A/B Testing · Front-End Development · Android Development · Agile · Python · React · RESTful APIs · Dashboard Reporting · EDA · Regression Analysis · Cross-Functional Collaboration
